

HackSoc Max MSP Sessions

Instructor: Amy Dickens

Location: The Hub - Computer Science

E-mail: team@hacksocnotts.co.uk

Slack: @amyd

Schedule

The first set of HackSoc lessons are designed to provide an introduction to Cycling74's Max MSP software and will follow the schedule below:

Week 1	11 October 2016	Intro to Max
Week 2	18 October 2016	Building your first patch
Week 3	25 October 2016	Chip Tune Hacking

Each week the lesson details will be posted to the GitHub repository following the session. This will include any presentations, links, help sheets and example max patch files.

Lesson Times:

Sessions are held on a weekly on Tuesday evenings. Each session will last two hours, from 18:30 to 20:30. Unlike our other society activities food will not be provided in these sessions but there will be access to refreshments. Please feel free to bring food along with you to the sessions; we appreciate that some of you may have lectures until 18:00 and we have no issues with food being consumed during the lesson times.

A member of the HackSoc exec will be present at the doors on the car park side of Computer Science to give any non-CS students access at the beginning of each session.

Prerequisites:

You do not need to know any programming or anything about audio engineering to attend these sessions.

However you will need a few things to get the most from the lessons:

A laptop (please note you must be able to install new software, i.e. have administrator rights, on the machine you bring to the sessions)

A pair of headphones

During the sessions:

Please be aware these sessions are open to all levels of learner and will be conducted on personal machines; as such some elements may take longer than anticipated. We have tried to plan the sessions around this and provide additional material where possible, but please be patient as we may encounter technical issues that cause delays.

Materials:

There will be reference materials provided that are specific to each lesson, these will be handed out during the session and posted in the GitHub repository following the lesson.

GitHub:

The GitHub repository for these sessions is hosted at:

<https://github.com/HackSocNotts/MaxMSP-Lessons>

This is a public repository. We will guide you on how to access this material in the first session.

Code of Conduct:

Help us to provide a safe and welcoming environment for everyone in our sessions by following these three simple points.

1. Respect everyone at the sessions as equal, give everyone the chance to speak and be listened to.
2. Respect the environment. A lot of time and care is put into planning these sessions and the School of Computer Science allows us to take over this space to do so. Help us to make sure this continues by cleaning up after sessions.
3. Talk to us. If something is happening in the sessions which you are not comfortable with then let us know. We are happy to help in anyway we can to make sure everyone is having a good experience.
